

On the Subject of Palette Identification

No, this isn't a "name that picture" module. Stop being judgemental.

Several bitmap images are given below, in their raw forms. One of these bitmaps is displayed on the module, each letter or number having been assigned one of a few colors. On the module, each color is labeled with an unrelated number for your convenience. Determine which image is displayed.

To solve the module, select the highlighted pixel as well as every pixel with the same raw form. A new pixel will then become highlighted. Repeat this process a total of four times, at which point the module will solve.

Selecting an incorrect pixel will incur a strike and highlight a new pixel.
